It is probably best for you to minimise the top panel though. You can do this by clicking on the arrow to the right of the Read Only label at the top right of the panel.

This places the panel for policies affecting your tenancy at the centre of your screen.

You can see the name of your tenancy in the top left of this panel.

	Add folder	II Add policy

This panel lists the policies in place for your tenancy and it is the only one you can edit. The policies are applied from top to bottom so a policy which applies to Everyone will take precedence over a policy that applies to staff. Your tenancy should only have policies enabled for groups of pupils that you deal with. For instance a primary school shouldn't have the sixth form policy enabled.

Blocking a Webpage

From the Filtering Policies Page go to the policies panel for your tenancy.

To block a webpage for all users click on of the icons to the left of 1. Everyone

ter	Cour policy has been locked due to an active log in to your	Smoothwall device. 🔒

Will open the dialogue box allowing you to add a URL to block a website

We suggest that you enter your name in the Comment box so that you keep a record of who has blocked the website in case a colleague wants it unblocked in the future.

Producing Reports on User Activity

On your Smoothwall homepage click on the Reports panel

≡ smoothwall [®] Home	e 😜
J (G)	Welcome to your Smoothwall portal home Click the menu or the dashboard cards below to access your licensed products.
Your licensed products	
کار ی Filter	
Protect your various users with our configurable filter.	Reports Investgate safeguarding issues with Reports
Available to buy	
®,	
Monitor Produce accurate Smart Profile reports on safe	
alerts and patterns of behavior.	

This will take you to your Reports dashboard which will look like this:

There are 2 dashboards available to you, one for the last 24 hours activity and one for the last 2 weeks. You can choose which dashboard to view by clicking on this button ______

The dashboard provides you with graphics detailing different aspects of web activity. You are not able to edit the dashboard although you will be able to filter the websearches that are reported on.

Writing a new report

To write a new report you should select the New Report option from the menu at the left of the window.

=	smoothwall®	Home / Dashboard
Rep	orts	Dashboard
	Dashboard	
1	New Report	
	Reports	

This menu can be minimised or maximised by clicking on the arrow at the bottom of the window.

The New Reports Window opens and it gives you the opportunity to report on 5 different areas.

Dashboard						
New Report	User Report	Device Report	S Domain Report	Category Report	Custom Report

>					

Once you have given your report a name you need to identify the user you want to report on.

In the Filters section enter the username of the user you want to report on.

If you are a Microsoft365 school the username will be in the format <Domain>\<username>. If you start typing in the name of your domain (or tenancy) you should be given the full list of users that you can report on after you have typed in enough letters to allow Smoothwall to identify your specific domain.

If you are a Google Workspace school then your username will be in the format username@domain.

Having identified the user that you want to report on you need to tell Smoothwall the period of time that you want the report to cover. We don't advise running a report for more than a 48 hour period. If you run a report for a longer period than that you might find that Smoothall takes a long time to produce the data.
