Agenda

- The Impact of the Covid Pandemic
- Policies and Practices
- Awareness Raising
- Reviewing and Developing Your Whole School Approach
- AI
- Professional Reputation
- How Does This Look in School?

10:45 Break

12:30 – 1:15 Lunch

3.30 pm Close

Aims of Today's Training

- To help participants to understand the potential as well as the risks of technology
- To help schools and settings to meet national and local expectations for online safety
- To develop participants skills in planning for and managing online safety issues
- To review associated policies and documentation
- To look at a range of materials and activities that can be used with pupils, appropriate to their age and ability

This is a safe environment for open conversations

**In attending this training,
we implicitly agree to this being
a confidential environment
without judgement.**

What is an Online Safety Child Protection Incident?

**A safeguarding incident
where technology is involved**

E-Safety, Online Safety, Internet Safety

What do we mean?

- **E-Safety** is less about restriction and more about education about the **risks** as well as the **benefits** so we can feel confident online.
- **E-Safety** is concerned with supporting children and young people to develop safer online behaviours, both in and out of school.
- **E-Safety** is constantly evolving.
- **E-Safety** is often defined as the safe and responsible use of technology. This includes the use of the internet and also other means of communication using electronic media (e.g. text messages, online messaging, social media, gaming devices, e-mail etc).
- In practice, **E-Safety** is as much about behaviour as it is electronic security.

The Impact of the Covid Pandemic

Risks:

When children spend time online they may be exposed to:

- **online abuse**
- **cyberbullying**
- **sexual exploitation**
- **sexting**
- **grooming**
- **radicalisation.**

Europol reported an increase in some countries of offenders attempting to contact young people via social media since the outbreak of the virus (Europol, 2020).

- **Lockdowns and high-level restrictions.** Children were spending more time at home and may not have seen friends & family in person = Increased importance for keeping intouch online.
- **Increased online time:** For many children, the ways they use the internet has expanded:
 - online communities
 - video-calling platforms.
 - support from services including school staff, social workers, counsellors and others in their support network.

While all this can bring benefits to children's mental health and wellbeing, for some, it presented new exposures to online risks.

The Impact of the Covid Pandemic

- Increase in use of Video Sharing Platforms TikTok being the most popular
- Significant increase in alternate devices for 'watching TV' and accessing on-demand content
- Online gaming has been a significant platform for connecting with friends (particularly with boys)
- Social media, messaging apps & video calls used by a majority to keep in touch with friends and family
- Rise of disinformation

The Impact of the Covid Pandemic

- Use of anonymous Q&A sites or apps by a minority (around 1/5 of 12-15s and 1/10 of 8-11s)
- Gradual disengagement with news, but happy to receive news via friends on social media
- Parents have found it harder to control screen time and more concerned about their child's online use
- Parents felt the need to relax some of the rules about online use

We've talked about the National Picture.

What were / are still your pressure points?

Change in Behaviours

Common factors

- More homelife/school boundaries crossed
- Abusive language
- Increased expectations
- Aggressive behaviour – parental and pupil
- Inappropriate use of sexual language
- Inappropriate sexual behaviour
- Secretive behaviour
- Addictive behaviour

Whole School Approach

Whole-school approaches are likely to make teaching more effective than lessons alone. A whole school approach is one that goes beyond teaching to include all aspects of school life, including culture, ethos, environment and partnerships with families and the community.

We recommend that schools embed teaching about online safety and harms within a whole school approach.

Keeping Children Safe in Education

It is essential that children are safeguarded from potentially harmful and inappropriate online material.

An effective whole school and college approach to online safety empowers a school or college to protect and educate pupils, students, and staff in their use of technology and establishes mechanisms to identify, intervene in, and escalate any concerns where appropriate.

The breadth of issues classified within online safety is considerable and ever evolving, but can be categorised into four areas of risk – the 4 Cs

Para 134

Keeping children safe in education 2024

Statutory guidance for schools
and colleges

2 September 2024

Keeping Children Safe in Education

[...Ensure] all staff undergo safeguarding and child protection training (including online safety which, amongst other things, includes an understanding of the expectations, applicable roles and responsibilities in relation to filtering and monitoring.

Para 123

Para 140 for further information

Keeping children safe in education 2024

Statutory guidance for schools
and colleges

2 September 2024

Keeping Children Safe in Education

Additional updates and how they affect you:

- Reference to appropriate filtering and monitoring on school devices and school networks **para 140 – 146**
- Remote education **para 138 – 139**
- The appropriateness of any filtering and monitoring systems are a matter for individual schools and colleges and will be informed in part, by the risk assessment required by the Prevent Duty **para 141**

Keeping children safe in education 2024

Statutory guidance for schools
and colleges

2 September 2024

Keeping Children Safe in Education

Additional updates and how they affect you:

- Raise awareness of expectations for relevant staff to understand filtering and monitoring **para 14**
- Reference to filtering and monitoring **para 103**
- Additional text added that staff training should include understanding roles and responsibilities in relation to filtering and monitoring **para 124**
- Mobile and smart technology for pupils **para 137** and with ref to staff policies including use of social media **para 90**

Keeping children safe in education 2024

Statutory guidance for schools
and colleges

2 September 2024

Infrastructure and Technology

Whilst it is essential that governing bodies and proprietors ensure that appropriate filters and monitoring systems are in place, they should be careful that “over blocking” does not lead to unreasonable restrictions as to what children can be taught with regard to online teaching and safeguarding.

*(Keeping Children Safe in Education, 2022 - 2024
para 133)*

Keeping children safe in education 2024

Statutory guidance for schools
and colleges

Infrastructure and Technology

[...]Governing bodies and proprietors should be doing all that they reasonably can to limit children's exposure to the above risks from the school or college's IT system.

They should ensure that the **leadership team and relevant staff have an awareness and understanding of the provisions in place and manage them effectively and know how to escalate concerns when identified.**

Governing bodies and proprietors should consider the number of and age range of their children, those who are potentially at greater risk of harm and how often they access the IT system along with **the proportionality of costs versus safeguarding risks.**

(Keeping Children Safe in Education, 2023-24

para 140

Infrastructure and Technology

The appropriateness of any filters and monitoring systems are a matter for individual schools and colleges and will be informed in part, by the risk assessment required by the Prevent Duty.

*(Keeping Children Safe in Education, 2023-2024
para 141*

Digital Monitoring – how it works

Infrastructure and Technology

Meeting DfE Digital Standards for Schools and Colleges.gov

Update in 29th March 2023

The categories aim to help schools and colleges to make more informed decisions about technology, leading to safer and more cost-efficient practices and learning opportunities for students including:

- **budgeting for technology procurement and maintenance**
- **buying technology equipment and services**
- **renewing a contract with a technology provider to ensure their purchases meet your needs**
- **correctly installing new equipment**

It is advised that all schools read the standards, assess if they meet the standards and plan accordingly.

Education and Training

“We want schools to equip their pupils with the knowledge needed to make the best use of the internet and technology in a safe, considered and respectful way, so they are able to reap the benefits of the online world.”

[Teaching online safety in school](#)

Teaching online safety in school

Guidance supporting schools to teach
their pupils how to stay safe online,
within new and existing school subjects

June 2019

Updated Jan 2023

Education and Training

Pupils are taught about online safety and harm addressing online safety and appropriate behaviour in an age-appropriate way that is relevant to their pupils' lives.

This is taught throughout

- statutory [relationships and health education](#) in primary schools
- statutory [relationships, sex and health education](#) in secondary schools

This complements the [computing curriculum](#), which covers the principles of online safety at all key stages, with progression in the content to reflect the different and escalating risks that pupils face.

Updated Jan 2023

The 4 areas of risk (4Cs)

- **Content** – being exposed to illegal, inappropriate or harmful material
- **Contact** – being subjected to harmful online interaction with other users
- **Conduct** – personal online behaviour that increases the likelihood of, or causes harm
- **Commerce** - risks such as online gambling

[KCSiE 2024 para 135](#)

[Social media and online safety | NSPCC Learning](#)

Content

- **Illegal**
- **Inappropriate / harmful**
e.g. fake news, racism, misogyny, self-harm, extremism, pornography

Contact

- **Bullying**
- **Grooming**
- **Sexual harassment**
- **Exploitation**
- **Influencing**
- **End-to-end encryption**

Conduct

- **Privacy**
- **Digital footprint**
- **Health & wellbeing**
- **Nudes & semi-nudes**
- **Copyright**
- **Live Streaming**

Commerce

- **Online gambling**
- **Advertising**
- **Phishing scams**
- **Financial scams**
- **Copyright**
- **Micro transactions**

Fake news and 'viral scares'

- ✓ Manage the initial reaction or impulse
- ✓ DO NOT send out specific warnings
Reinforce general messages, and reassure
- ✓ Direct parents to useful guidance
(e.g. [ThinkuKnow](#), [BBC Own IT](#))
- ✓ Follow safeguarding procedures for any concerns

Welcome to CEOP Education

 Education from the National Crime Agency

The National Crime Agency's CEOP Education team aim to help protect children and young people from online child sexual abuse.

We do this through our education programme, providing training, resources and information to professionals working with children, young people and their families.

I am:

 A professional working with children and young people	 A parent or carer	
 4-7 years old	 8-10 years old	 11-18 years old

Education and Training

Computing Curriculum

- Safely, Respectfully, Responsibly
- Know where to go for help and support
- Recognise acceptable / unacceptable behaviour

PSHE & Computing Curriculum

- Online identities
- Healthy relationships, both online and offline
- Respect for others even when anonymous
- Critically consider online 'friendships' and sources of information
- Citizenship

- Recognising the risks of online content to wellbeing and health
- Benefits of the internet and managing online time
- Respectful behaviour and keeping personal information private
- Age restrictions
- Reporting concerns and accessing support
- Being a discerning consumer of information

STATUTORY ONLINE SAFETY CURRICULUM

Teaching online safety

- Teach behaviours, not technology
- Link online and offline activity
- Keep it relevant - but beware 'promoting' behaviours
- Recognise shift to focus on health, wellbeing and relationships
- Integrate PSHE approaches (e.g. distancing)
- Make reporting easy
- Be careful about your messaging

Curriculum audit

The ICT Service |
e-safety/education-and-training

[Online Safety Curriculum Audit Template](#)

Online Safety Curriculum Audit

This auditing tool has been designed to provide a checklist for schools wishing to evaluate suitability and appropriateness of their online safety curriculum. It is not intended to be fully comprehensive but aims to cover a wide range of factors and is designed to support discussions around how the schools' online safety education can be further improved in line with the requirement to:

'ensure that children are taught about safeguarding, including online safety...as part of providing a broad and balanced curriculum.'
(KCSIE)

'have an age-related, comprehensive curriculum for e-safety' (Ofsted 2010).

This audit has been created by The [Cambridgeshire Education ICT Service](#) and includes questions from the UKCCIS ['Online safety in schools and colleges: Questions from the Governing Board'](#)

This auditing document should be considered alongside the original and widely recognised "PIES model for limiting e-safety risk". This was an effective framework developed to provide a safeguarding strategy for organisations. It offers a simple way of mitigating against risks through a combination of effective **policies and practice**, a robust and secure technology **infrastructure**, and **education and training** for learners and employees alike, underpinned by **standards and inspection**.

Inspection

- Understanding the categories of online risk and developing a culture of e-safety
- Identifying e-safety provision around policy, practice, infrastructure, education and training
- Highlighting good and poor practice and exploring sample inspection questions

https://www.kelsi.org.uk/data/assets/pdf_file/0008/28871/Inspecting-e-safety-Ofsted.pdf

Inspection

Previous guidance for Ofsted inspection said that schools should have *“appropriate filters and monitoring systems in place to protect children from online harms and cyber security risks”*.

The update now goes further, stating that inspectors should consider whether governing bodies and proprietors

“do all that they reasonably can to limit children’s exposure to any risks from the school or college’s IT system”. It adds: ***“As part of this process, governing bodies and proprietors ensure that their school or college has appropriate filters and monitoring systems in place to protect children from potentially harmful content, and regularly review their effectiveness.”***

Awareness Raising

A look back through the history of Online Safety

As a National agenda

2008

The Report of the Byron Review

2008

2010

“Child safety (online or offline) is a hotly debated issue.

*A focus on the most terrible but least frequent risks can skew debate in a direction that sends out negative and fear-based messages to **children**, young people and families.*

I hope that this report will enable thinking to remain proportionate and balanced and will embed the issue of child digital safety within a broader context of building resilience (for example skills of critical evaluation, risk management and self monitoring) with a clear understanding of the importance of risk experiences and their management for child learning and development.

Finally, I urge all those who read this report to retain the needs of children and young people at the centre of their thinking and consistently ask themselves how quickly and effectively we are making a meaningful difference for them.”

The Online Safety Act

“Today will go down as an historic moment that ensures the online safety of British society not only now, but for decades to come.

I am immensely proud of the work that has gone into the Online Safety Act from its very inception to it becoming law today. The Bill protects free speech, empowers adults and will ensure that platforms remove illegal content.

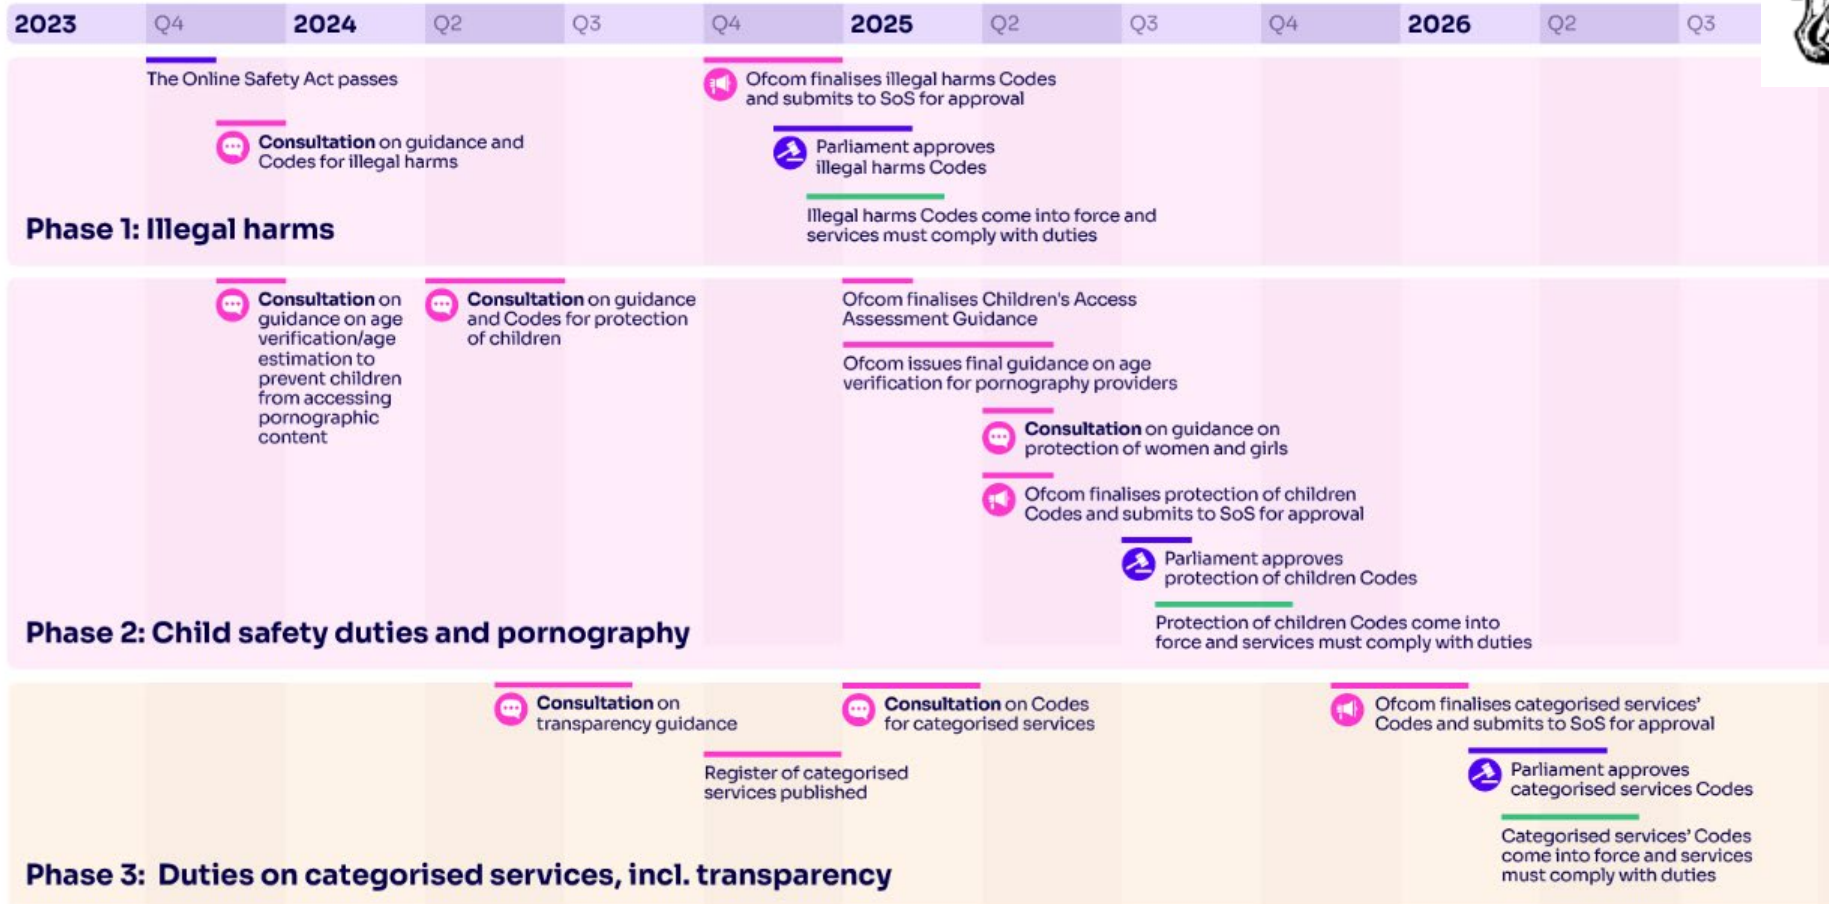

At the heart of this Bill, however, is the protection of children. I would like to thank the campaigners, parliamentarians, survivors of abuse and charities that have worked tirelessly, not only to get this Act over the finishing line, but to ensure that it will make the UK the safest place to be online in the world.”

Technology Secretary Michelle Donelan

The Online Safety Act

Taking a zero-tolerance approach to protecting children.

For social media platforms and the content they host It does this by making sure they:

- remove illegal content quickly or prevent it from appearing in the first place, including content promoting self-harm
- prevent children from accessing harmful and age-inappropriate content including pornographic content, content that promotes, encourages or provides instructions for suicide, self-harm or eating disorders, content depicting or encouraging serious violence or bullying content
- enforce age limits and use age-checking measures on platforms where content harmful to children is published
- ensure social media platforms are more transparent about the risks and dangers posed to children on their sites, including by publishing risk assessments
- provide parents and children with clear and accessible ways to report problems online when they do arise

Lunch
12:30 – 1:15

“I’ve come up with a set of rules that describe our reactions to technologies:

1. Anything that’s already in the world when you’re born is just normal and ordinary and is just a natural part of the way the world works.
2. Anything that gets invented between when you’re fifteen and thirty five is new, exciting and revolutionary and with any luck you can make a career out of it.
3. Anything that gets invented after you’re thirty five is against the natural order of things until it has been around for about ten years when it gradually turns out to be alright really.”

Douglas Adams (1952 – 2001) Author of The Hitchhiker’s Guide to the Galaxy

This quote first appeared in the Sunday Times on 29th August 1999

The AI technology is here

Protecting data, pupils and staff

“Generative AI

- *stores and learns from the data it is given – any data entered should not be identifiable*
- *can create believable content, including more credible scam emails requesting payment*
- *people interact with generative AI differently and the content may seem more authoritative and believable”*

Protecting data, pupils and staff

“Schools and colleges should:

- protect personal and special category data...
- not allow or cause intellectual property, including pupils' work, to be used to train generative AI models, without appropriate consent or exemption to copyright
- review and strengthen their cyber security by referring to the [cyber standards](#) – generative AI could increase the sophistication and credibility of attacks
- ensure that children and young people are not accessing or creating harmful or inappropriate content online, including through generative AI - [keeping children safe in education](#) provides schools and colleges with information on:
 - what they need to do to protect pupils and students online
 - how they can limit children's exposure to risks from the school's or college's IT system”

Protecting data, pupils and staff

As professionals:

- ✓ **Manually fact-check the output provided to verify whether a piece of information is correct or not.**

Lateral Reading: checking facts, figures, and arguments against news sites, industry reports, books, studies via a search engine...

- ✓ **Do due diligence**

Risk assess to protect your professional **reputation** and that of your school/MAT.

- ✓ **Be mindful of the risks and limitations**

of these technologies to ensure your get the best results

As educators:

- ✓ **Ensure learners know the importance to fact-check and to verify whether a piece of information is correct or not.**

Scaffolding with appropriate digital literacy skills across all ages, supporting them to question and to know how to fact check.

- ✓ **Be mindful of the risks and limitations of these technologies.**

If you are using them, to ensure your get the best results.

- ✓ **Have conversations**

Increase your awareness and that of your learners, appropriate to age and stage without promotion.

Do you have policies in place which cover these considerations for staff use and for student use?

AI or REAL?

TAKE THE QUIZ

The monthly AI or real quiz

Artificial intelligence is already very impressive, with many AI images and videos so flawless that it can be difficult to tell what's fake and what's real. But as it continues to develop, will this become an impossible task?

Challenge yourself with this month's quiz and see if you can spot the REAL from the AI!

Challenge yourself with this month's quiz and see if you can spot the REAL from the AI!
become an impossible task

Artificial intelligence is already very impressive, with many AI images and videos so flawless

Text-to-Image Technology

Text-to-image UI (eg: Midjourney)

You type in what you want to see; the software generates the image.

- Available as local opensource (Stable Diffusion) or closed cloud (DALL-E, Midjourney) software.
- Accepts positive text '**prompts**' (desirable attributes) and negative (non-desirable attributes).
- Trained on enormous tagged datasets of real imagery.

Realism

What are we seeing?

1. Hundreds of new AI CSAM images based upon known victims;
2. AI CSAM generated from online images of children in non-abusive situations;
3. Children as creators;
4. De-aging of celebrities to make them look childlike, depicting them in sexually abusive contexts;
5. Likenesses of famous children in sexual abuse situations;
6. Celebrities as offenders. This could affect anyone with enough images available of them in the public domain.
7. The commercialisation of this imagery.

on Social Media?

Protecting Your Professional Reputation Online

Communicating with children online

If you're using social media or messaging/video apps to communicate with children as part of your work, you must consider safeguarding measures.

NSPCC has updated online safety and social media page to include information and advice on:

- policies and procedures for ensuring online safety
- behavioural codes and appropriate language when using social media
- managing online communities
- how to livestream safely.
- using the correct channels for communication

Your professional use of technology

Consider your own use and relationship with technology; the behaviours that you model and practice with particular focus on good Data Protection, GDPR and information management.

Protecting Your Professional Reputation Online

1. Google yourself
2. Remove damaging content
3. Watch what you post
4. Establish a professional social media presence
5. Lock down your personal social media profiles
6. Address student concerns both in class and online
7. Clearly document everything when dealing with difficult situations
8. Create content that showcases your knowledge and expertise
9. Monitor review sites

Guidance for Safer Working Practice

“All staff have a responsibility to maintain public confidence in their ability to safeguard the welfare and best interests of children.

They should adopt high standards of personal conduct in order to maintain confidence and respect of the general public and those with whom they work.”

[Guidance for safer working practice for those working with children and young people in education settings \(pg 3\)](#)

Supporting parents

Modelling the online safety principles consistently.

This includes expecting the same standards of behaviour whenever a pupil is online at school - be it in class, logged on at the library or using their own device in the playground.

Schools should also ensure they extend support to parents, so they are able to incorporate the same principles of online safety at home. The further sources of information section includes information about organisations who can either support schools engage with parents or support parents directly.

[Teaching-online-safety-in-schools](#)

Supporting parents

- Provide information that can be accessed through Newsletters, Website etc
- Try to be proactive rather than reactive
- Provide easy access to policies
- Run regular events aimed at different audiences
- Get in early – promote good behaviours and if possible, parental agreement, from when children start school
- Back to school sessions

The ICT Service Online Safety Hub From Smoothwall

The screenshot shows the 'Online Safety Hub' website. At the top, it features the 'the ict service.' logo and the title 'Online Safety Hub' with the tagline 'Trusted digital safety advice for caregivers'. There are navigation links for 'About', 'Staff', and 'Parent', and a search bar. A horizontal menu below the header lists categories: 'Reviews', 'Parental controls', 'Help', 'Social media', 'Screen time', 'Gaming', 'Smartphones', and 'More'. The main content area is divided into sections. On the left, there is a featured article titled 'The Risks of Social Media Therapy' with a 'Social media' tag and a brief description: 'Young people are using social media platforms to discuss and self-diagnose mental health issues. What you should know about this potentially risky trend.' To the right, there are two columns of content. The 'Most Recent' column includes 'Personal, Private Information: Worksheet' (Privacy and security), 'Staying Safe Online: Student Worksheet' (Online risks), 'Identifying Strangers Online: Lesson Activity' (Online risks), and 'Data and Cookies: Explainer for Students' (Privacy and security). The 'Reviews' column lists 'Minecraft' (Gaming, Our Age Rating: 9+), 'Roblox' (Gaming, Our Age Rating: 12+), 'YouTube' (Entertainment, Our Age Rating: 10+), and 'Snapchat' (Social Media, Our Age Rating: 14+).

Infrastructure & Technology

System Security

With the rise of digital learning, advanced technologies and the targeting of cyber-attacks on the education sector resulting in data loss, breaches and high recovery costs, schools need to have a robust framework for their technology and infrastructure.

This framework should cover a broad range of aspects, including hardware, software, network, and data management to ensure the security of data and the safety and well-being of the staff and pupils.

"Whilst it is essential that governing bodies and proprietors ensure that appropriate filtering and monitoring systems are in place, they should be careful that "over blocking" does not lead to unreasonable restrictions as to what children can be taught with regard to online teaching and safeguarding."

*(Keeping Children Safe in Education (KCSiE), 2023
Paragraph 134)*

How does this look in school?

A high-quality computing education equips pupils to use computational thinking and creativity to understand and change the world.

Computing has deep links with mathematics, science, and design and technology, and provides insights into both natural and artificial systems.

The core of computing is computer science, in which pupils are taught the principles of information and computation, how digital systems work, and how to put this knowledge to use through programming.

Building on this knowledge and understanding, pupils are equipped to use information technology to create programs, systems and a range of content.

Computing also ensures that pupils become digitally literate – able to use, and express themselves and develop their ideas through, information and communication technology – at a level suitable for the future workplace and as active participants in a digital world.

How does this look in school?

Computational Thinking

The ability to understand concepts and develop strategies to

Solve problems

Understand behaviours including those of humans/in nature

Break complex problems into smaller, manageable parts

Develop algorithms to solve problems

Utilise logical reasoning to solve a problem

Computational Extraction

Simplifying complex problems by focusing on essential details.

Ignoring unnecessary information.

How does this look in school?

129. In schools, relevant topics will be included within

- **Relationships Education (for all primary pupils)**
- **Relationships and Sex Education (for all secondary pupils)**
- **Health Education (for all primary and secondary pupils).**

130. Preventative education is most effective in the context of a whole-school or college approach that prepares pupils and students for life in modern Britain and creates a culture of zero tolerance for sexism, misogyny/misandry, homophobia, biphobic and sexual violence/harassment.

How does this look in school?

130. [...] These will be underpinned by the school/college's behaviour policy and pastoral support system, as well as by a planned programme of evidence based RSHE delivered in regularly timetabled lessons and reinforced throughout the whole curriculum.

Such a programme should be fully inclusive and developed to be age and stage of development appropriate (especially when considering the needs of children with SEND and disabilities and other vulnerabilities).

This programme will tackle, at an age-appropriate stage, issues such as:

- healthy and respectful relationships
- boundaries and consent
- stereotyping, prejudice and equality
- body confidence and self-esteem
- what constitutes sexual harassment and sexual violence and why these are always unacceptable.
- how to recognise an abusive relationship, including coercive and controlling behaviour the concepts of, and laws relating to - sexual consent, sexual exploitation, abuse, grooming, coercion, harassment, rape, domestic abuse, so-called 'honour'-based violence such as forced marriage and Female Genital Mutilation (FGM).

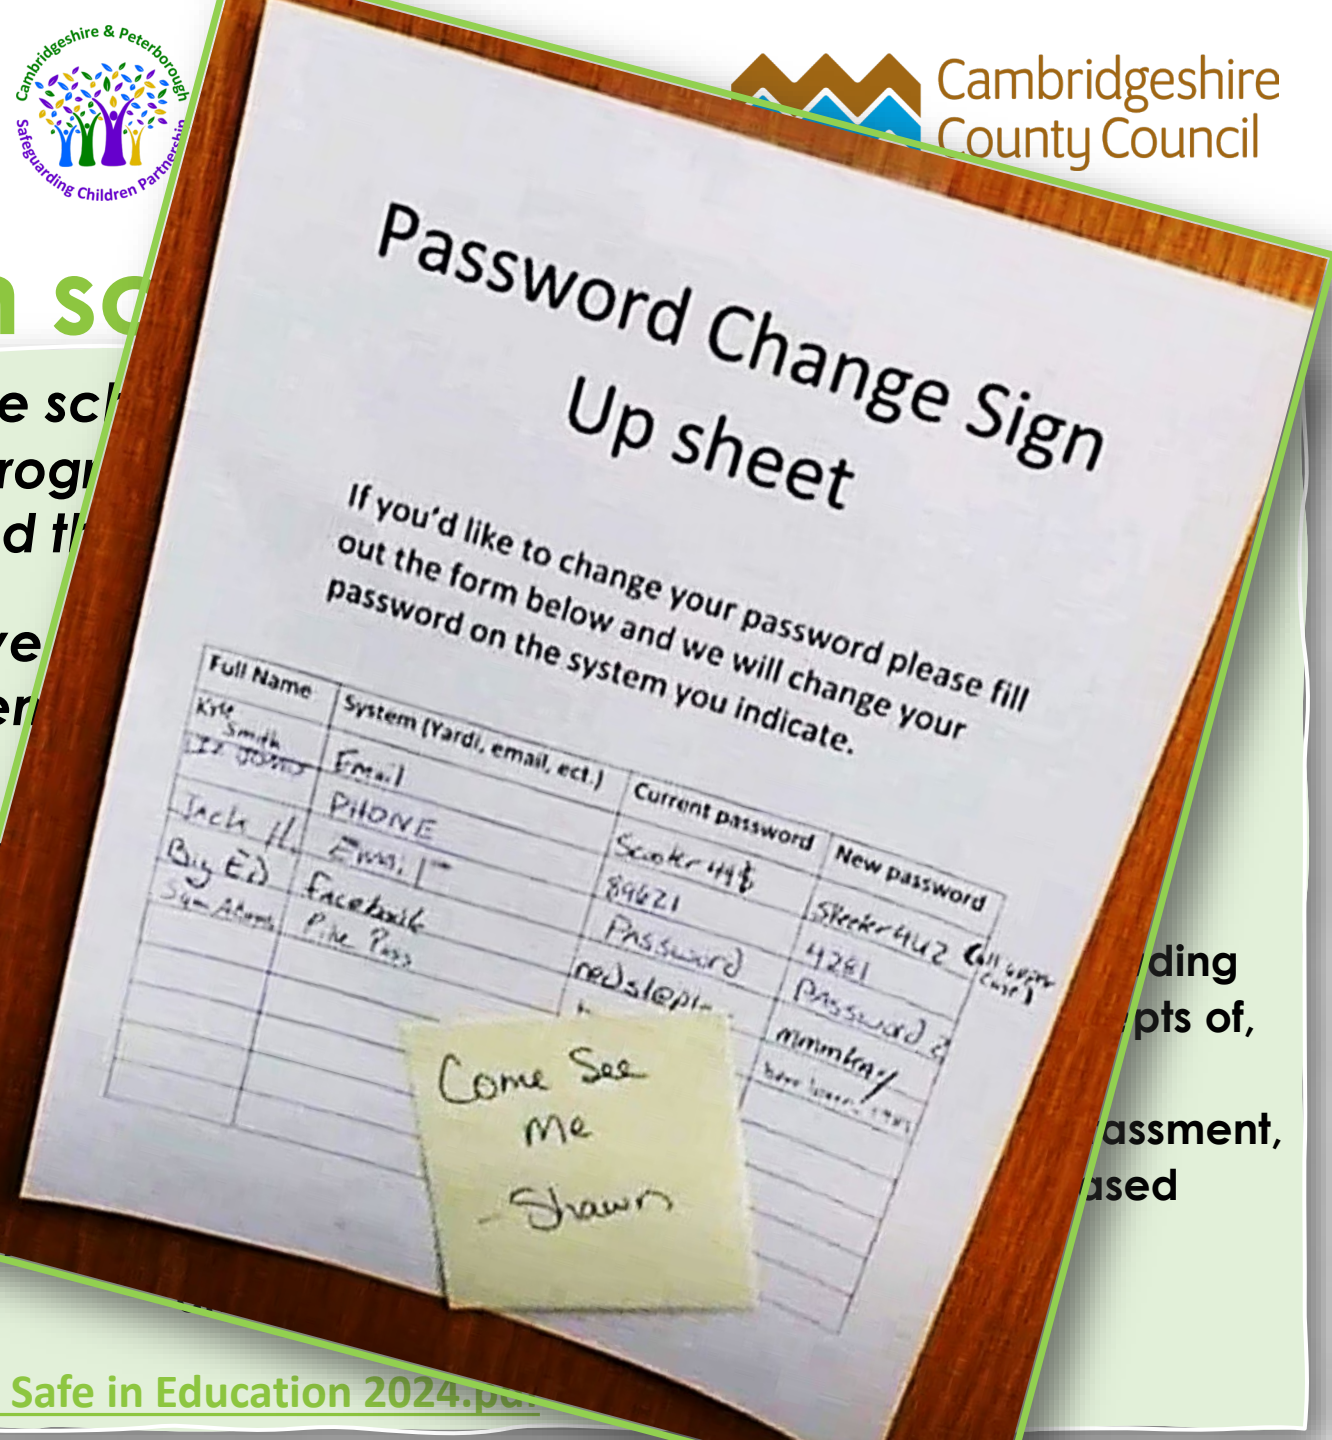

How does this look in so

130. [...] These will be underpinned by the school's support system, as well as by a planned programme of regularly timetabled lessons and reinforced through

How can we ensure a narrative
that equips our young learners
with essential life skills?

To foster resilience,
empathy, and
critical thinking...

To develop positive
behaviours and
attitudes

**What is our own
relationship
with technology?**

**How do we use it
ourselves?**

To enhance our lives?

To get jobs done?

To switch off?

To self-regulate?

How does this look in school?

BBC Radio 4 08/10/2024 Z | Peter Hyman and Amol Rajan talk Oracy

Peter Hyman, former senior advisor to Tony Blair and Kier Starmer, discussed the need for a broader, richer, and more cutting-edge curriculum that equips young people for life and work in the modern world [...] aimed at raising school standards and ensuring students are prepared for future challenges.

Hyman emphasised the importance of oracy, or the ability to express oneself fluently and grammatically in speech, as a critical skill for social mobility and personal development [...] the “golden thread” that weaves through all subjects in the curriculum. He highlighted its benefits not only for academic knowledge but also for fostering empathy, bridging social divides, and improving mental health and well-being.

He argues that the modern curriculum should include oracy and digital skills.

In a world of rapid technological change, students need to be equipped with the digital literacy necessary to navigate AI and other emerging technologies [... That] the current curriculum doesn't provide the space for educators to fully embrace these skills.
